PROFESSIONAL SUMMARY

Senior Android Engineer with 6 years of experience building scalable mobile products across Healthcare AI, FinTech, Payments, Education, and Sustainability domains. Expertise in Kotlin, Java, Jetpack Compose, modern Android architecture, and end-to-end product development. Currently focused on Agentic AI, Claude-ready codebases, and SDLC automation to accelerate developer productivity and software delivery. Passionate about building intelligent products.

TECHNICAL SKILLS

- **Programming Languages:** Kotlin, Java, XML, SQLite
- **Android Development:** Jetpack Compose, Android SDK, MVVM, LiveData, Coroutines, Data Binding, Room DB, Animations, Push Notifications (FCM), Flow, Material Design, Network Caching, Offline Support, Design Patterns, Dagger/Hilt, Performance Profiling, Android Keystore, Jetpack libraries
- **Networking & APIs:** Retrofit, OkHttp, REST, GraphQL, gRPC
- **Tools & Frameworks:** Android Studio, Firebase, Crashlytics, Pendo Analytics, JIRA
- **Architecture & Testing:** Clean Architecture, Modularization, Unit Testing (JUnit, Espresso), TDD, Dependency Injection
- **Version Control & Deployment:** Git, Github, Google Play Console, CI/CD Pipelines, Gradle
- **Other:** Performance Optimization, Secure App Development, UI/UX Implementation

EXPERIENCE

Verifone - Senior Android Developer

December 2025 – Present

- Migrate legacy XML/Java Android POS codebase to Kotlin and Jetpack Compose for a large-scale, compliance-driven payment system.
- Build agentic AI workflows, and orchestration pipelines for Test Automation Lab 360 tool using Claude.
- Develop Android POS applications using Kotlin, integrating Payment SDKs and managing end-to-end transaction flows.
- Build domain-specific AI agents and Claude-ready codebase solutions to enable AI-assisted development and SDLC automation.
- Lead Payment SDK integrations and Android POS solutions for banking projects across APAC, including Bangkok Bank (BBL), Thailand.

Suki AI - Software Development Engineer-3

September 2022 - December 2025

An AI-powered, voice-enabled digital assistant for doctors, designed to simplify clinical documentation and reduce administrative workload.

- Developed and optimized core Android modules using Kotlin, Java, and Jetpack Compose under MVVM architecture.
- Improved app responsiveness and voice interaction speed by optimizing gRPC audio streaming and GraphQL/REST integrations.
- Strengthened app security with Android Keystore encryption and biometric authentication.
- Implemented CI/CD pipelines using Buildkite, reducing manual release effort and improving deployment reliability.
- Managed Play Store releases, streamlined JIRA workflows, and conducted peer code reviews.
- Collaborated with design and QA teams to enhance usability, stability, and overall app performance.

Hummingwave Technologies - Software Development Engineer

September 2020 - September 2022

- Designed and developed 20+ Android applications using Kotlin, MVVM, Room DB, and Retrofit, ensuring clean, modular architecture
- Built and maintained multi-flavor apps (BSBI, UPES, Pearl Academy) from a shared codebase, improving development efficiency by 40%
- Collaborated directly with clients to define technical requirements, ensuring on-time, quality deliverables.
- Resolved production issues proactively and contributed to scalable architecture decisions across teams.

Delhi Metro Rail Corporation Limited (DMRC) - Operations Intern

May 2019 - July 2019

EDUCATION

Madan Mohan Malaviya University of Technology

B.Tech (ECE) | **82.2%** | 2016-2020

Maharshi Patanjali Vidya Mandir (C.B.S.E.)

Intermediate | **90%** | 2015

Maharshi Patanjali Vidya Mandir (C.B.S.E.)

High School | CGPA: **10** | 2013

ACHIEVEMENTS & RECOGNITIONS

- Winner, Suki Internal **Hackathon** - People's Choice Award.
 - Earned **LinkedIn Community Top Voice Badge** for expertise in mobile development, software development, and 10+ technical domains.
 - UPCST Project Lead: Led a project funded by **Uttar Pradesh Council of Science and Technology**.
 - **AICTE Merit Scholarship**: Recipient for 4 consecutive years.
 - Led Multiple Committees: Served as **Technical Secretary (CSA)**, **Joint Secretary (IEEE Student Branch)**, and **Managerial Head (Robotics Club)**.
-

PROJECTS

Suki – Digital Assistant for Doctors ([Suki - Play Store link](#))

September 2022- December 2025

- Voice-enabled AI assistant simplifying medical documentation with seamless EHR integration
- Designed Compose-based UI components for voice-driven workflows and real-time transcription
- Implemented an audio streaming client using gRPC and managed session states effectively
- Developed a modular architecture for feature isolation and improved build efficiency
- Automated the app distribution workflow using Buildkite and Firebase, optimizing deployment speed and efficiency.
- Strengthened security by migrating sensitive keys from the codebase to Remote Config, minimizing release dependencies and enhancing flexibility.
- Refined concurrency, caching, and lifecycle management to deliver better app performance

Yamaha Merchant and Customer Apps ([Genblu Merchant - Play Store link](#))

May 2021 - June 2022

- Reward system for Yamaha merchants to manage campaigns and points
- Loyalty app for Yamaha customers to earn and redeem event points ([Genblu Customer - Play Store link](#))
- Implemented RBAC, OTP auto-read, push notifications, displayed transaction history, QR scans, and point redemption
- Used ExoPlayer for videos and Picasso for image rendering

Quambio ([Quambio - Play Store link](#))

January 2021- March 2021

- Gamified sustainability app that tracks CO₂ reduction through user activities using Strava API integration
- Designed interactive UI with animations and visual variations
- Integrated Strava API for activity synchronization, developed challenges, dashboard, and leaderboard modules
- Managed CO₂ cube tracking and marketplace using Firebase

EDMI Electric Meter Reading App ([EDMI - Play Store link](#))

October 2021 - September 2022

- Handheld app for RF-based electric meter readings. Tech: Java, Firebase, RF Communication, IEEE 754, Android SDK
- Managed local database for large-scale meter data storage
- Analyzed and integrated RF communication protocols for accurate data reading
- Built tracking modules, activity management, and real-time data processing for field efficiency

Global University Systems Applications ([BSBI - Play Store Link](#))

December 2020 - September 2022

- Multi-university applications (BSBI, Pearl Academy, UPES, MUA) for announcements, events, and webinars.
 - Developed shared MVVM codebase with flavoring for reuse
 - Created C# APIs in Visual Studio linked with Umbraco CMS
 - Used Room DB and LiveData for offline data flow
-

CONTRIBUTIONS & UNIT

- Featured on #TheAndroidShow by Google for Gemini AI insights. - [Link](#)
- Active LinkedIn creator, sharing Android insights with 19K+ followers.
- Published technical articles on Android best practices, Compose, and optimization.
- Mentor at Google Developer Groups (GDG), supporting developers through workshops, and technical guidance.
- Beta tester and early feedback provider for Android tools and libraries.
